

Alabama Board of Nursing and Alabama Board of Medical Examiners
Standard Formulary of Legend Non-controlled Drug Classifications
Certified Registered Nurse Practitioners (CRNP)
Certified Nurse Midwives (CNM)

Standard Prescriptive authority for CRNP and CNM does not include any controlled substances. Authorized categories of drugs should reflect the needs of the medical practice in which the CRNP/CNM is working. All written prescriptions must adhere to the standard, recommended doses of legend drugs, as identified in the Physicians' Desk Reference or the product information insert, not to exceed the recommended treatment regimen periods.

Prescriptive authority for controlled substances requires a Qualified Alabama Controlled Substance Certificate issued by the Alabama Board of Medical Examiners to the specified CRNP or CNM in addition to Standard Prescriptive Authority
