

INNOVATIVE MOBILE APP

for Recovery Management!

FirstLab™ is dedicated to providing high quality services to assist those in recovery from addictive disease. We understand that managing recovery through daily check-in & testing can be stressful. “FirstLab Recovery Tracker” mobile app provides more convenient access to online services for program participants, allowing them to check-in, see their calendar, find and navigate to a collection, set notification alerts and check-in to meetings on their mobile devices. This app brings together popular features that establish a **Recovery Home Base**, that engages the participant and enhances their experience. Available for both Apple (iOS) and Android devices, this free downloadable Mobile Application will assist the participants in managing their own recovery.

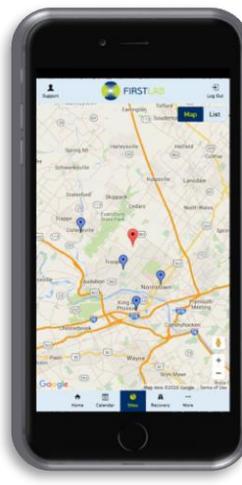

Participants can now use their mobile devices to:

Check-In
Sobriety Counter
Daily Quote

Check-In at
