SPECIALTY DRUG FORMULARY

Upon request and approved for the CRNP and CNM applicant, the following drugs may be prescribed within the limitations defined below by the Alabama Board of Nursing and the Alabama Board of Medical Examiners.

Please note: all written prescriptions must adhere to the standard, recommended doses of legend drugs, as identified in the Physicians' Desk Reference or the product information insert, not to exceed the recommended treatment regimen periods.

Antineoplastic Agents: Initial dose must be prescribed by a physician, with authorization to prescribe continuing maintenance doses according to written protocol or direct order of the physician.

Oxytocics for CRNP – may be prescribed only in consultation with the physician.

Radioactive Agents: If requested, attach a copy of the **physician's current license from the Alabama Department of Public Health for prescribing/dispensing radioactive pharmaceuticals**. Attach the prescribing protocol for the applicant with this physician.

Anti-Rheumatic Drugs: Non-biologic disease-modifying anti-rheumatic drugs (DMARDS): Initial dose must be prescribed by a physician, with authorization to prescribe continuing maintenance doses according to written protocol or direct order of the physician.

Biologic DMARDS: Initial dose must be prescribed by a physician, with authorization to prescribe continuing maintenance doses according to written protocol or direct order of the physician.

Non-Tumor Necrosing Factor (TNF) Inhibitors: Initial dose must be prescribed by a physician, with authorization to prescribe continuing maintenance doses according to written protocol or direct order of the physician.
