4 AMA PRA Category 1 credits, 4 ABIM MOC or 4 AANP,
including 1.38 AANP Pharm
*can be applied towards MATE ACT

Pain Management

P.A.C.T. Update

Practical Approaches to Comprehensive Treatment of Pain 2024–2025

The nation is facing competing public health issues: the need to treat a large number of Americans with acute and chronic pain vs the crisis of opioid abuse. The National AHEC Organization has partnered with Pri-Med to offer the P.A.C.T. Update: Practical Approaches to Comprehensive Treatment of Pain 2024–2025 curriculum which focuses on:

- ✓ Improving clinicians' ability to recognize, diagnose, and classify pain
- ✓ Education practitioners on the full spectrum of pain management options, including non-opioid pharmacologic interventions
- ✓ Providing risk reduction strategies through integration of opioids into individualized pain management plans
